

WILCOMATIC LIMITED

ENVIRONMENTAL POLICY

The Company places the greatest importance on both its legal and moral obligations towards the environment. It has a commitment to continual improvement and prevention of pollution. It also has a commitment to meet or exceed relevant environmental legislation, regulations and other requirements. The following principles will be used to achieve this.

- Minimising the unnecessary use of materials such as in house consumables and monitor and recycle packaging materials.
- Monitor and where possible reduce energy consumption. Office electric and gas and vehicle fuel consumption.
- Adopting environmentally friendly technologies and processes.
- Promoting products such as water reclaim & harvesting systems and WEB 300 to avoid unnecessary vehicle journeys.
- Mechanical refurbishing and recycling of parts, where practical and carwash machines.
- Minimising possible contamination of water courses, ground sub soil etc..
- Ensuring that waste materials are only disposed of by appropriate means and by authorised / licensed contractors.
- Minimising the potential impact of noise on the surrounding community.

The company will regard legislative requirements as setting minimum standards for its activities and use an accredited program to mitigate any damage to the environment generated by our activities.

The Finance Director has been given a specific responsibility within the company for ensuring that appropriate standards are met, but all members of staff are expected to co-operate in achieving this aim and complying with the principles described above.
